EXPERIENCE

Software Engineer Consultant at Criptala

July 2023 - To date | Montevideo - Uruguay

Contracted to enhance development workflows and produce comprehensive documentation for applications.

- Improved developing pipelines and added hooks to improve code maintainability.
- Created documentation and generated new developing flows.

Software Engineer at Halo Media LLC

September 2021 - September 2023 | New York - USA (remote)

Developed solutions mainly for a white label ticket selling company with Js technologies and embedded apps.

- Embed React apps within different web pages (Angular, React, WordPress) to buy tickets for concerts or itinerant shows.
- Integrated different payment platforms such as Stripe and Square, among others.
- Worked and created pipelines on Heroku and Netlify.

Full stack Developer & Technical Leader at RYPT

August 2018 - September 2021 | Dublin - Ireland

Technical leader & Architect of RYPT Front End Web app. A web app that lets trainers follow up with their athletes and create workouts, exercises, graphs of performance, and other BI features that are constantly evolving.

- Created the Front End App using angular 2 from scratch and updated to the latest angular version, over a Microsoft Azure pipeline.
- Implemented Stripe payment method.
- Created and integrated E2E test suite on Microsoft Azure with Jest.
- Worked on the Back End based on ExpressJs over NodeJS.

Frontend Developer at OneTree

February 2017 - June 2018 | Montevideo - Uruguay

Helped to develop different Agile engineering projects for U.S. companies that wanted excellent UX/UI and performance.

- Worked on different projects with different technologies such as AngularJS, Angular2+, NodeJs, React, etc
- Completed detailed programming and development tasks for front end and websites.

Software Engineer Intern at Cisco Systems Inc

March 2015 - September 2015 | Galway - Ireland

Worked as a Software Engineer developing a Windows client application called Jabber, using the Scrum development process.

- Work on a large-scale Agile engineering project on a highly usable, top-quality enterprise product.
- Programmed on C# and .NET

EDUCATION

Chainlink Hackathon
Full-Stack web developer | April - June 2023

(UdelaR) Universidad de la Republicar
Degree in Computer Information Systems | 2018

Cisco Systems Internetworking (Ireland) Ltd.
Oranmore Business Park, Oranmore,
Galway, Ireland.

Direct: +353 91 384600
www.cisco.com

I am very pleased to write this letter of reference on behalf of Agustin Becerra in my capacity as a Software Development Manager of Cisco Systems. Agustin served his internship with us during 2015.

He joined the unified communication team and worked on client side development on one of the more important products in our business unit. He used a range of software development tools and even with limited experience, he proved to be very productive and produced a number of improvements to the overall product.

He worked in an agile environment, as part of an existing scrum team. He integrated very well into the team, was a liked character and had a big part to play in weekly output and delivery of the team.

He showed himself to be very capable technically and displayed a great deal of initiative as part of his internship.

In closing, I would welcome Agustin into our team any day. And with the correct development and working environment, would have no doubt he would develop into an excellent engineer.

Sincerely,

Derek Joyce

Software Development Manager,

Cisco
