Available on request.

EXPERIENCE

Software Engineer at Halo Media LLC

September 2021 - To date | New York - USA (remote)

Developed solutions mainly for a white label ticket selling company with Js technologies and embedded apps.

- Embed React apps within different web pages (Angular, React, WordPress) to buy tickets for concerts or itinerant shows.
- Integrated different payment platforms such as Stripe and Square, among others.
- Worked and created pipelines on Heroku and Netlify.
- Team Leader of the Affinity Group Food & Beverage Community.

Full stack Developer & Technical Leader at RYPT

August 2018 - September 2021 | Dublin - Ireland

Technical leader & Architect of RYPT Front End Web app. A web app that lets trainers follow up with their athletes and create workouts, exercises, graphs of performance, and other BI features that are constantly evolving.

- Created from scratch the Front End App using angular 2, evolved and maintained through time to the latest angular version, with Microsoft Azure Docker pipeline.
- Implemented Stripe payment method.
- Created a test suite on the Microsoft Azure pipeline with Jest Framework on Puppeteer, a Headless browser.
- Worked on the Back End based on ExpressJs over NodeJS.

Frontend Developer at OneTree

February 2017 - June 2018 | Montevideo - Uruguay

Helped to develop different Agile engineering projects for U.S. companies that wanted excellent UX/UI and performance.

- Worked on different projects with different technologies such as AngularJS, Angular2+, NodeJs, React, etc
- Completed detailed programming and development tasks for front end and websites.
- Leveraged expertise in software design and development with multiple programming languages

Software Engineer Intern at Cisco Systems Inc

March 2015 - September 2015 | Galway - Ireland

Worked as a Software Engineer developing a Windows client application called Jabber, using the Scrum development process.

- Learned from top-notch Cisco engineers about software-engineered processes and the product development life cycle.
- Work on a large-scale Agile engineering project on a highly usable, top-quality enterprise product.
- Programmed on C# and .NET
- Workshop of Windows dump file debugging on assembler

EDUCATION

Chainlink Hackathon
Full-Stack web developer | April - June 2023

(UdelaR) Universidad de la Republicar
Degree in Computer Information Systems | 2018

Cisco Systems Internetworking (Ireland) Ltd.
Oranmore Business Park, Oranmore,
Galway, Ireland.

Direct: +353 91 384600
www.cisco.com

I am very pleased to write this letter of reference on behalf of Agustin Becerra in my capacity as a Software Development Manager of Cisco Systems. Agustin served his internship with us during 2015.

He joined the unified communication team and worked on client side development on one of the more important products in our business unit. He used a range of software development tools and even with limited experience, he proved to be very productive and produced a number of improvements to the overall product.

He worked in an agile environment, as part of an existing scrum team. He integrated very well into the team, was a liked character and had a big part to play in weekly output and delivery of the team.

He showed himself to be very capable technically and displayed a great deal of initiative as part of his internship.

In closing, I would welcome Agustin into our team any day. And with the correct development and working environment, would have no doubt he would develop into an excellent engineer.

Sincerely,

Derek Joyce

Software Development Manager,

Cisco
